

31 Friday
27 Jamadi-ul-Awwal

5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30	31	

Course :

"Four Pillars of OOP"
(Udemy)

↳ Consider we want to make a function that calculates salary for employee.

cal-salary()

↑
employee

01 Saturday
28 Jamadi-ul-Awwal

↳ But this function can be call on student as well. that does not make sense. We want to restrict access only to employee.

02 Sunday
29 Jamadi-ul-Awwal

↳ So classes & functions helps us do that where we place cal-salary() in a box & seal it (Only access to employee)

Student
